## Canon - PG-210 / CL-211

After installing your cartridges, you'll notice the printer still thinks they're empty, despite having just been refilled. This will not prevent you from printing, but you will get a few friendly reminders from the printer that you are using "empty" or refilled cartridges. Simply click OK to these warnings. If there is no option to continue printing (see message below), read the message and follow the steps outlined. You will be prompted to do this once for each of the cartridges refilled. After you've done it, you will never be prompted again for that cartridge.

Canon MP240 series Printer - USB002	
	The following ink has run out. Black (PG-210) Replace the ink cartridge and close the cover. If printing is in progress and you want to continue printing, press the printer's Stop/Reset button for at least 5 seconds with the ink cartridge installed. Then printing can continue under the ink out condition. The function for detecting the remaining ink level will be disabled. Replace the empty ink cartridge immediately after the printing. The resulting print quality is not satisfactory, if printing is continued under the ink out condition.

Notice this message asks you to **hold the printer's STOP Button for 5 seconds**. Follow these instructions and you can continue printing without difficulty.
